The information contained in this manual is intended as a guide and resource for elementary Montessori teachers. While North American Montessori Center has done its best to provide accurate and up-to-date information, this information may change over time. We have where possible provided print and Web resources that teachers can use to update information. However, the manual does not replace the research and preparation teachers must do to present information effectively to students and to meet specific government licensing requirements for safety, classroom, and educational standards.

Important Note

Please note, no part of this manual is permitted to be scanned, photocopied, or shared in any format for any reason without the express written permission of North American Montessori Center.

# TABLE OF CONTENTS

**HOW THIS MANUAL CAN BE USED** ................................................. 1

**INTRODUCTION** ................................................................. 3

**MATTER** .................................................................................. 6
Introduction ................................................................. 6

**Atoms** ...................................................................................... 7
Background Information ......................................................... 7
Activity 1: Learning About the Parts of the Atom ................. 12
Activity 2: Investigating the Size of Atoms ....................... 15
Activity 3: Exploring the Structure of the Atom ................. 17

**Molecules** ............................................................................... 20
Background Information ......................................................... 20
Activity 1: Learning About Molecules ............................... 24
Activity 2: Making Models of Water Molecules ................. 27
Experiment 1: Investigating the Attraction of Water Molecules 30

**Chemical Elements** ............................................................... 34
Background Information ......................................................... 34
Activity 1: Learning About the Periodic Table of the Elements: Part 1 40
Activity 2: Learning About the Periodic Table of the Elements: Part 2 43
Activity 3: Learning About the Elements in Common Materials 45

**The States of Matter** ............................................................... 47
Background Information ......................................................... 47
Experiment 1: Changing a Solid to a Liquid to a Gas ........ 51
Activity 1: Demonstrating Changes in States of Matter ....... 53
Activity 2: Demonstrating How Solids, Liquids and Gases
Exert Pressure ................................................................. 56
Experiment 2: Investigating the Expansion of a Gas
Through Change in Temperature ......................................... 58

**Changes in Matter** ................................................................. 60
Background Information ......................................................... 60
Experiment 1: Investigating Physical Changes in Matter ....... 62
Activity 1: Demonstrating Chemical Changes in Matter ....... 65
Experiment 2: Investigating Chemical Changes in Reactions ... 67
Experiment 3: Investigating a Reaction With a Compound .... 69
